EXTRAORDINARY
PART II—Section 3
PUBLISHED BY AUTHORITY

No. 74]   **NEW DELHI, THURSDAY, MARCH 3, 1955**

MINISTRY OF COMMERCE AND INDUSTRY
NOTIFICATIONS

Bombay, the 3rd March 1955

S.R.O. 529.—In exercise of the powers conferred on me by clause 22 of the Cotton Textiles (Control) Order, 1948, I hereby direct that the following further amendments shall be made in the Textile Commissioner's notification No. 80-Tex.1/48(iii), dated the 2nd August 1948, namely:—

In the said notification—

I. For paragraph 5 the following paragraph shall be substituted, namely:—

"5. In the case of each piece or unit of cloth of the kind specified in column 2 of the table below, the markings specified in the corresponding entry in column 3 thereof shall be made:—

"TABLE"

1	2	3
1.	Where the average count of yarn used in the cloth is 17s or finer but is less than 35s.	Medium
2.	Where the average count of yarn used in the cloth is 35s or finer but is less than 48s.	Fine
3.	Where the average count of yarn used in the cloth is 48s or finer	Fine (Super)

Explanation I.—The term "average count" for the purpose of this paragraph shall mean the average count of warp and weft used in the cloth which shall be determined in accordance with the following formula:—

$$\text{Average Count} = \frac{(\text{Count of warp} \times \text{the number of ends per inch in the reed}) \text{ plus } (\text{count of weft} \times \text{the number of picks per inch})}{(\text{number of ends per inch in the reed}) \text{ plus } (\text{number of picks per inch})}.$$

Explanation II.—For multiple fold yarn, the count of the basic single yarn shall be taken and the ends per inch or the picks per inch multiplied by the number of plies in the yarn. Count in the case of all yarn shall mean the grey count of yarn.

Explanation III.—Yarn used in the borders or selvedges shall be ignored.

Explanation IV.—The average count shall be rounded off by treating 0·50 and above as one, and omitting 0·49 and below".

II. For paragraph 5A the following paragraph shall be substituted, namely:—

"5A. (i) The letters 'AV.CT' representing the average count and the appropriate average count of warp and weft used in the cloth in Arabic numerals.

(ii) The length in yards and width in inches".

III. After sub-paragraph (c) of paragraph 8 the following shall be inserted, namely:—

"(d) The total quantity of cloth in the bale in terms of square yards as well as in linear yards".

[No. (TC(3)32/48.]

V. NANJAPPA,

Textile Commissioner.

New Delhi, the 3rd March 1955

S.R.O. 530.—*In exercise of the powers conferred by sub-clause (1) of Clause 5 of the Cotton Textiles (Export Control) Order, 1949, the Central Government hereby directs that the following further amendments shall be made in the Notification of the Government of India in the late Ministry of Commerce No. 67-C.W.(25A)/48, dated the 26th March 1949, namely:—*

In the said notification in sub-paragraph (1) of paragraph 2—

I. for items (iii) and (iv) the following shall be substituted, namely:—

"(iii) the width of the cloth in inches, the length in yards and the letters 'AV.CT' representing the average count and the appropriate average count of warp and weft used in the cloth in Arabic numerals".

"(iv) in the case of cloth of the kind specified in column 2 of the table below, the marking specified in the corresponding entry in column 3 thereof.

"TABLE"

1	2	3
1.	Where the average count of yarn used in the cloth is 17s or finer but less than 35s.	Medium
2.	Where the average count of yarn used in the cloth is 35s or finer but is less than 48s.	Fine
3.	Where the average count of yarn used in the cloth is 48s or finer.	Fine (Super)

Explanation I.—The term "average count" for the purpose of this paragraph shall mean the average count of warp and weft used in the cloth which shall be determined in accordance with the following formula:—

$$\text{Average Count} = \frac{(\text{Count of warp} \times \text{the number of ends per inch in the reed}) \text{ plus } (\text{count of weft} \times \text{the number of picks per inch})}{(\text{number of ends per inch in the reed}) \text{ plus } (\text{number of picks per inch})}.$$

Explanation II.—For multiple fold yarn, the count of the basic single yarn shall be taken and the ends per inch or the picks per inch multiplied by the number of plies in the yarn. Count in the case of all yarn shall mean the grey count of yarn.

Explanation III.—Yarn used in the borders or selvedges shall be ignored.

Explanation IV.—The average count shall be rounded off by treating 0·50 and above as one and omitting 0·49 and below."
